Approved by the World Agricultural Outlook Board. Summary released September 16, 1992. The summary of the next *Fruit and Tree Nuts Situation and Outlook* is scheduled for release in November 1992. Summaries and text of reports may be accessed electronically; for details, call (202) 720-5505.

Time to renew? Your subscription to the *Fruit and Tree Nuts Situation and Outlook* expires in the month and year shown on the top line of your address label. If your subscription is about to expire, renew today. Call 1-800-999-6779.

The *Fruit and Tree Nuts Situation and Outlook* is published three times a year and supplemented by a yearbook.

Summary

Larger Fruit Production Boosts Crop Value in 1991

Total U.S. citrus production increased 4 percent in 1990/91 from a year earlier. The value of production rose 7 percent to \$2.41 billion, as gains in Florida and Arizona offset declines in California and Texas. In 1990/91, Florida orange and grapefruit production rebounded from the December 1989 freeze. A severe freeze in December 1990 lowered California production of all citrus fruit, especially navel and Valencia oranges, each down 64 percent.

Although some tree damage was severe, California citrus production rebounded significantly in 1991/92. In 1992, California's nonbearing orange acreage increased for the fourth consecutive year, and orange production will likely resume its rising long-term trend as more nonbearing acres come into production. Florida orange production was lower in 1991/92 than in 1990/91, but the increasing number of bearing acres will likely produce larger crops during the next several years.

Utilized noncitrus fruit production in 1991 (including a record strawberry crop) totaled 15.8 million tons, up 1 percent from 1990, but short of the 1989 record. Larger crops of apples, sweet cherries, cranberries, peaches, and California dried prunes more-than-offset smaller 1991 crops of apricots, tart cherries, grapes, nectarines, and pears. The 1991 value of production for noncitrus fruit hit a record \$6.04 billion.

A larger 1991 apple crop and record-high prices increased the value of apple production to \$1.8 billion, up 22 percent from the record set the previous year. Higher values of production coincided with larger crops of sweet cherries, cranberries, peaches, and California dried prunes. Record-high pear prices increased the value of pear production to \$274 million, up 2 percent from 1990.

The value of tree nut production in 1991 hit a record \$1.28 billion, up 1 percent from a year earlier. A significantly larger pecan crop boosted the value of pecan production by 25 percent. A good-quality walnut crop helped increase the value of walnut production by 18 percent. Smaller crops of almonds, macadamia nuts, and pistachios resulted in lower values of production, down 10, 15, and 21 percent, respectively.

Revised Exports to Canada Lower Consumption Estimates for Most Fresh Fruit

Canadian import data for 1978 through 1989 indicate that more fruit was exported from the United States to Canada than had been reported by the U.S. Commerce Department. For most fruits, the underreporting was more marked in 1983-87, but the differences varied among

commodities and from year to year. In 1984 and 1985, Canadian imports of fresh peaches and nectarines were more than double those reported; U.S. exports of fresh strawberries to Canada were 100-150 percent underreported from 1985 through 1989; and, from 1981 through 1989, avocado imports were from two to eight times higher than reported by Commerce.

Canada received a large share of all U.S. fresh fruit exports in 1978-89, so substituting Canadian import data for U.S. export data increased total U.S. exports for almost all types of fresh fruit. Total peach and nectarine exports increased over 100 percent in both 1984 and 1985, because most U.S. exports were to Canada. A smaller share of U.S. avocados went to Canada, so the change in total avocado exports was less than 50 percent in most years.

Revisions in the total amount of fresh-market apple exports were relatively small, ranging from a 2-percent increase in 1980 to a 21-percent increase in 1986. In 1978-89, exports were revised upward from 5 to 35 percent for pears, from 26 to 66 percent for grapes, from 3 to 19 percent for grapefruit, and from 19 to 34 percent for oranges. For many of the fresh-market fruits, exports were small compared to total supply, so even large revisions in export figures had little impact on supply.

Revisions of the 1978-89 export data lowered per capita consumption estimates slightly. For example, 1985 citrus fruit consumption was revised from 22.64 to 21.55 pounds per capita and noncitrus consumption from 66.70 to 65.26 pounds per capita, so the 1985 total fruit consumption estimate came down 2.53 pounds (about 3 percent) to 86.81 pounds.

Estimates of 1991 fresh fruit consumption show a decrease of almost 2 pounds per capita, based on a 2.18 pound decline in citrus consumption that more-than-offset a 0.19-pound increase in noncitrus. A sharp drop in the supply of fresh-market oranges, due to freeze damage in California, pushed the 1991 per capita consumption estimate down more than 4 pounds from the prior year to 8.34 pounds--the lowest ever estimated by USDA's Economic Research Service.

New Procedure for Calculating Per Capita Fruit Juice Consumption

A new procedure for calculating per capita fruit juice consumption has been instituted this year. Previously, separate consumption figures were calculated for concentrate, canned, and chilled citrus juice using industry pack statistics, USDA cold storage reports, and Commerce Department trade data. The new procedure varies from the old in its measurement of U.S. juice production.

USDA data on crop utilization for juice has replaced industry pack statistics. Changes in stocks for Florida orange juice and grapefruit juice are reflected in the calculations. The consumption is reported as gallons of single-strength equivalent, whether consumed as concentrate, canned, or chilled products.

This procedure allows estimates of lemon, lime, apple, and grape juice that were not previously estimated. The consumption estimate also reflects the consumption of juice in blended mixes as well as straight juice.

Total per capita citrus-juice consumption has been quite flat at 5-6 gallons in the last two decades. Most is orange juice, with consumption at less than one-half gallon for grapefruit and about one-tenth of a gallon for both lemon and lime juice. Per capita orange-juice consumption dropped from 5.0 gallons in 1988/89 to about 4.3 gallons in 1989/90, reflecting high prices after the severe Florida freeze in December 1989. Orange-juice consumption

recovered some in 1990/91 but still did not reach the prefreeze level of over 4.7 gallons.

Per capita apple-juice consumption continued to show a strong upward trend, reaching 1.75 gallons in 1990/91. This is more than three times the consumption rate of the early 1970's. More than half of total consumption has been supplied by imports in recent years. Per capita consumption of grape juice has been almost constant at 0.2-0.3 gallons.

Total per capita consumption of selected citrus and noncitrus juices has been near 7.5 gallons annually since 1984/85, except for 1989/90 when it dropped due to high prices following freeze damage to the Florida orange crop. Insufficient information is available to calculate per capita consumption of pineapple and cranberry juice, which are likely significant quantities. Insufficient data also preclude the calculation of other minor-use juices such as raspberry and guava.

Value of Fruit and Tree Nut Production in 1991

California Orange Production Recovers in 1991/92

Fresh Fruit Indexes Higher in 1991

U.S. Tree Nut Utilization

List of Tables

GENERAL

	Page
A-1. Bearing acreage for fruits and tree nuts, United States, 1970 to date	9
A-2. Utilized production and value of production of citrus and noncitrus fruit, United States, 1970 to date	9
A-3. Bearing acreage for selected citrus and noncitrus fruits, United States, 1970 to date	10
A-4. Total commercial production for selected citrus and noncitrus fruits, United States 1970 to date	11
A-5. Average price indexes for fruit, United States, 1970 to date	12
A-6. Annual average retail prices for selected fruits, United States, 1980 to date	12

NONCITRUS FRUIT

General:

B-1. Utilization of noncitrus fruit production, and value, United States, 1970 to date	13
B-2. Fruit, frozen: Commercial pack, United States, 1970 to date	14
B-3. Fruit, dried: Production (dry basis), California, 1970 to date	15

Apples:

B-4. Apples: Production, utilization, and season-average grower prices, United States, 1970 to date	15
B-5. Apples, fresh: Monthly prices received by growers, United States, 1970 to date	16
B-6. Apples, red delicious, fresh: Monthly retail prices, United States, 1980 to date	16
B-7. Fresh apples: Supply and utilization, 1970/71 to date	17
B-8. Apples: Processed utilization and season-average grower price, United States, 1970 to date	17

Avocados:

B-9. Avocados: Production, season-average grower price, and value, by States, 1970/71 to date	18
---	----

Bananas:

B-10. Bananas: Number of farms, acreage, production, price, and value, Hawaii, 1970 to date	18
B-11. Fresh bananas: Supply and utilization, 1970 to date	19

Cherries:

B-12. Cherries, sweet: Production, utilization, and season-average grower price, United States, 1970 to date ...	19
B-13. Cherries, tart: Production, utilization, and season-average grower price, United States, 1970 to date	20

Grapes:

B-14. Grapes: Production, utilization, and season-average grower price, United States, 1970 to date	20
B-15. Grapes: Production, and season-average grower price, California, 1970 to date	21
B-16. Fresh grapes: Supply and utilization, 1970/71 to date	21
B-17. Grapes: Processed utilization and season-average grower price, United States, 1970 to date	22
B-18. Dried raisins: Total and export shipments, imports, and per capita consumption, 1970/71 to date	22

Kiwifruit:

B-19. Kiwifruit: Acreage, production, season-average grower price, and value, California, 1980 to date	23
--	----

Mangoes:

B-20. Mangos: Acreage, bearing trees, production, season-average grower prices, and value, Florida, 1970 to date	23
---	----

Nectarines:

B-21. Nectarines: Production, utilization, and season-average grower price, California, 1970 to date	24
--	----

Olives:

B-22. Olives: Bearing acreage, production, utilization, and season-average grower price, and value, California, 1970 to date	24
---	----

Papayas:

B-23. Papayas: Acreage, yield per acre, production, utilization, and season-average grower price, Hawaii, 1970 to date	25
---	----

Peaches:

B-24. Peaches: Production, utilization, and season-average grower price, United States, 1970 to date	25
B-25. Peaches, fresh: Monthly prices received by growers, United States, 1970 to date	26
B-26. Fresh peaches, Supply and utilization, 1970 to date	26
B-27. Peaches: Processed utilization, and season-average grower price, United States, 1970 to date	27

Pears

B-28. All pears: Production, utilization, and season-average grower price, United States, 1970 to date	27
B-29. Bartlett pears: Production, utilization, and season-average grower price, United States, 1970 to date	28
B-30. Pears, fresh: Monthly prices received by growers, United States, 1970 to date	28
B-31. Fresh pears: Supply and utilization, 1970/71 to date	29

Pineapples:

B-32. Pineapples: Number of farms, acreage, production, disposition, price, and value, Hawaii, 1970 to date . . .	29
---	----

Plums and prunes:

B-33. Plums: Acreage, production, season-average grower price, and value, California, 1970 to date	30
B-34. Prunes (dried basis): Acreage, production, season-average grower price, and value, California, 1970 to date	30
B-35. Prunes and plums: Production, utilization, and season-average grower price, 4 States, 1970 to date	31
B-36. Dried prunes: Supply and utilization, 1970/71 to date	31

CITRUS FRUIT**Grapefruit:**

C-1. Grapefruit: Bearing acreage and yield per acre, by State, 1969/70 to date	32
C-2. Grapefruit: Production by State, 1969/70 to date	32
C-3. Grapefruit: Utilization of production, by State, 1969/70 to date	33
C-4. Grapefruit: Equivalent-on-tree returns, by State, 1969/70 to date	33
C-5. All grapefruit: Monthly equivalent-on-tree returns received by growers, Arizona, 1969/70 to date	34
C-6. All grapefruit: Monthly equivalent-on-tree returns received by growers, California, 1969/70 to date	34
C-7. All grapefruit: Monthly equivalent-on-tree returns received by growers, Florida, 1969/70 to date	35
C-8. All grapefruit: Monthly equivalent-on-tree returns received by growers, Texas, 1969/70 to date	35
C-9. All grapefruit: Monthly equivalent-on-tree returns received by growers, United States, 1969/70 to date . .	36
C-10. Fresh grapefruit: Supply and utilization, 1969/70 to date	36
C-11. Grapefruit processed, Florida, 1969/70 to date	37
C-12. Grapefruit juice: Supply and utilization, 1969/70 to date	37
C-13. Canned grapefruit juice: Cannery stocks, pack, supplies, and movement, Florida, 1969/70 to date	38
C-14. Frozen concentrated grapefruit juice: Cannery stocks, pack, supplies, and movement, Florida, 1969/70 to date	38

Lemons:

C-15. Lemons: Acreage, yield per acre, and production, by State, 1969/70 to date	39
C-16. Lemons: Utilization of production, by State, 1969/70 to date	39
C-17. All lemons: Equivalent-on-tree returns, by State, 1969/70 to date	40
C-18. All lemons: Monthly equivalent-on-tree returns received by growers, Arizona, 1969/70 to date	40
C-19. All lemons: Monthly equivalent-on-tree returns received by growers, California, 1969/70 to date	40
C-20. All lemons: Monthly equivalent-on-tree returns received by growers, United States, 1969/70 to date	41
C-21. Fresh lemons: Supply and utilization, 1969/70 to date	41

Limes:

C-22. Limes: Acreage, yield per acre, production, utilization, season-average grower price, and value, Florida, 1969/70 to date	42
C-23. Fresh limes: Supply and utilization, 1969/70 to date	42

Oranges:

C-24. Oranges: Bearing acreage and yield per acre, 1969/70 to date	43
C-25. Oranges: Production by State, 1969/70 to date	43
C-26. Oranges: Utilization of production, by State, 1969/70 to date	44
C-27. All oranges: Equivalent-on-tree returns, by State, 1969/70 to date	44
C-28. All oranges: Monthly equivalent-on-tree returns, received by growers, Arizona, 1969/70 to date	45
C-29. All oranges: Monthly equivalent-on-tree returns, received by growers, California, 1969/70 to date	45
C-30. All oranges: Monthly equivalent-on-tree returns, received by growers, Florida, 1969/70 to date	46
C-31. All oranges: Monthly equivalent-on-tree returns, received by growers, Texas, 1969/70 to date	46

TREE NUTS

General:

E-1. All tree nuts: Bearing acreage, United States, 1970/71 to date	58
E-2. All tree nuts: Gross return per bearing acre, United States, 1970/71 to date	58
E-3. All tree nuts (shelled basis): Utilized production, United States, 1970/71 to date	59
E-4. All tree nuts: Season-average grower prices, United States, 1970/71 to date	59
E-5. All tree nuts: Value of production, United States, 1970/71 to date	60
E-6. All tree nuts: Supply and utilization, United States, 1970/71 to date	60

Almonds:

E-7. Almonds (shelled basis): Acreage, yield per acre, production, season-average grower price, and value, California, 1970 to date	61
E-8. Almonds: Supply and utilization (shelled basis), 1970/71 to date	61

Hazelnuts:

E-9. Hazelnuts (filberts) (in-shell): Bearing acreage and yield per acre, by State, 1970 to date	62
E-10. Hazelnuts (filberts) (in-shell): Production, season-average grower price, and value, by State, 1970 to date	62
E-11. Hazelnuts (filberts): Supply and utilization (shelled basis), 1970/71 to date	63

Macadamia nuts:

E-12. Macadamia nuts (in-shell): Acreage, yield per acre, production, season-average grower price, and value, Hawaii, 1970 to date	63
--	----

Pecans:

E-13. Pecans (in-shell): Production, season-average grower price, and value, United States, 1970 to date	64
E-14. Pecans: Supply and utilization (shelled basis), 1970 to date	64

Pistachios:

E-15. Pistachios (in-shell): Production, season-average grower price, and value, California, 1977 to date	65
E-16. Pistachios: Supply and utilization (shelled basis), 1970 to date	65

Walnuts:

E-17. Walnuts (English), (in-shell): Production, season-average grower price, and value, California, 1970 to date	66
E-18. Walnuts: Supply and utilization (shelled basis), 1970 to date	66

PER CAPITA CONSUMPTION

F-1. Fresh fruit: Per capita consumption, 1970 to date	67
F-2. Canned fruit: Per capita consumption, product weight basis, 1970 to date	68
F-3. Frozen fruit: Per capita consumption, product weight basis, 1970 to date	68
F-4. Dried fruit: Per capita consumption, product weight basis, 1970 to date	69
F-5. Selected fruit juices: Per capita consumptions, 1970 to date	69
F-6. Apples: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product 1970 to date	70
F-7. Grapes: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1970 to date	70
F-9. Total U.S. population	71
F-10. Pineapples: Per capita utilization plus imports and minus exports, fresh-weight equivalent, 1970 to date	71
F-11. Tree nuts (shelled basis): Per capita consumption, 1970/71 to date	71

TRADE**Noncitrus:**

G-1. Apples: Exports from major exporting countries, 1970 to date	72
G-2. Bananas: Exports from major exporting countries, 1970 to date	73
G-3. Grapes: Exports from major exporting countries, 1970 to date	74
G-4. Peaches and nectarines: Exports from major exporting countries, 1970 to date	75
G-5. Pears: Exports from major exporting countries, 1970 to date	76

Citrus:

G-6. Grapefruit: Exports from major exporting countries, 1970 to date	77
G-7. Lemons and limes: Exports from major exporting countries, 1970 to date	78
G-8. Oranges: Exports from major exporting countries, 1970 to date	79
G-9. Tangerines: Exports from major exporting countries, 1970 to date	80

Tree nuts:

G-10. Tree nuts: Imports, United States, 1978 to date	81
G-11. Tree nuts: Exports, United States, 1978 to date	82

PRODUCTION AND VALUE BY STATES**Fruit and edible tree nuts:**

H-1. Fruit and edible tree nuts: Utilized production, by States 1991	83-84
H-2. Fruit and edible tree nuts: Value of production, by States 1991	85-86
H-3. Fruit and edible tree nuts: Utilized production, by States 1990	87-88
H-4. Fruit and edible tree nuts: Value of production, by States 1990	89-90
H-5. Fruit and edible tree nuts: Utilized production, by States 1989	91-92
H-6. Fruit and edible tree nuts: Value of production, by States 1989	93-94
H-7. Fruit and edible tree nuts: Utilized production, by States 1988	95-96
H-8. Fruit and edible tree nuts: Value of production, by States 1988	97-98

Table A-1--Bearing acreage for fruits and tree nuts, United States, 1970 to date

Year	Citrus fruit 1/	Major deciduous fruits 2/	Miscellaneous noncitrus 3/	Tree nuts 4/	Total 5/
--1,000 acres--					
1970	1,143.8	1,575.6	236.5	343.5	3,299.4

1/ NASS began reporting "limited" and "undersized" as separate categories in 1990 and made estimates for 1988 and 1989.

All data for 1988, 1989, 1990 are reported by NASS.

2/ Mostly canned except for 1971 and 1980 when use of limited size fruit in canned ripe olives was not permitted. Reported by California Olive Committee for 1970 to 1987.

3/ "Limited and undersized" reported by NASS, minus "limited size" reported by California Olive Committee for 1970 to 1987. Includes undersized and culls.

Sources: National Agricultural Statistics Service, USDA and California Olive Committee.

1/ Differences between total and utilized production are cranberries that were put in set-aside under the Cranberry Market Order. Cranberries put in set-aside, but sold for exports, are included in utilized production. 2/ Cranberries paid for by processors and lost because of dehydration and berry breakdown after delivery. 3/ Equivalent returns at first delivery point, screened basis of utilized production. 4/ 1 barrel = 100 pounds.

1/ Beginning July 1 for almonds, hazelnuts, and pecans; August 1 for walnuts; September 1 for pistachios; and January 1 of first year indicated for macadamias and all others. Other tree nuts include Brazil, pignolias, chestnuts, cashews, and miscellaneous.

2/ Utilized production minus marketable production which in part is inedibles and noncommercial useage.

3/ Marketable production is used to calculate consumption which excludes inedibles and noncommercial useage.

4/ Previous year's ending stocks.

5/ Marketable production plus imports plus beginning stocks.

6/ Preliminary estimates.

1/ Season beginning August 1.

2/ Utilized production minus marketable production which in part includes inedibles and noncommercial usage.

3/ Marketable production is used to calculate consumption which excludes inedibles and noncommercial usage.

4/ Previous year's ending stocks.

5/ Marketable production plus imports plus beginning stocks.

6/ Preliminary estimates.

N.A. = Not available.

-- = negligible amounts.

1/ Season beginning September 1.

2/ Utilized production minus marketable production which in part includes inedibles and noncommercial usage.

3/ Marketable production is used to calculate consumption which excludes inedibles and noncommercial usage.

4/ Previous year's ending stocks.

5/ Marketable production plus imports plus beginning stocks.

6/ Preliminary estimates.

N.A. = Not available.

1/ Excludes prepared nuts.

2/ Includes minor quantity of in-shell product.

3/ Total product weight, fresh or dried, whether or not shelled or peeled.

4/ Includes minor quantity of shelled product.

N.A. = not available.

1/ Excludes prepared nuts.

2/ Total product weight, fresh or dried, whether or not shelled or peeled.

3/ Shelled equivalent.

4/ In-shell equivalent.

Farmers, Farm Labor Contractors, Agricultural Associations!

Find out what you NEED to know about hiring agricultural labor.

Agricultural employers need to understand the Federal laws and regulations that affect their employees. *A Summary of Federal Laws and Regulations Affecting Agricultural Employers, 1992* provides ALL the details about:

- Health and safety regulations
- Pesticide laws affecting farming
- Protection of migrant and seasonal agricultural workers
- Employee wages, hours, and overtime pay
- Child labor restrictions, Social Security
- Who is covered and who is exempted
- Recordkeeping standards
- Equal employment opportunity laws
- Penalties for violators

This new report from USDA's Economic Research Service summarizes all the Federal laws and regulations that affect agricultural employment. It examines the Fair Labor Standards Act, Americans with Disabilities Act, and other recent regulatory changes. An "Additional Resources" listing directs you to other specialized government publications on pesticide safety, labor law, worker identification documents, and equal employment requirements for employers.

A Summary of Federal Laws and Regulations Affecting Agricultural Employers, 1992. Aug. 1992. 34 pages.
